FOR IMMEDIATE RELEASE

New, Innovative Mounting Brackets Reduce Urinal Installation Time

GRAND RAPIDS, Mich. – May 16, 2005 – Falcon Waterfree Technologies today announced the availability of the industry's first single-piece mounting bracket for urinals. Installers and customers will benefit from faster, more precise installations of waterfree urinals as a result of using the new bracket. This innovation is the result of Falcon's extensive research and development initiatives, which continue to produce the most advanced technology available for zero-water consumption urinals.

The new Falcon uni-bracket is a single-piece mounting bracket that replaces traditional two-piece brackets for urinal installations. The uni-bracket is constructed of high-grade treated steel, for maximum strength and durability. The mounting-hole pattern matches popular urinal supports/carriers. Installation time and expenses can be reduced as a result of using the new bracket.

- more -

All Falcon Waterfree urinals now feature the new uni-brackets in the standard installation hardware kits.

About Falcon Waterfree Technologies

Falcon Waterfree Technologies is the world leader for zero-water consumption urinals. The company was formed to promote conservation of the Earth's limited supply water and support sustainable resource management. Falcon products are in use around the world, in facilities from stadiums and arenas, to schools and universities, airports and every type of commercial and institutional facility. More information Falcon and its products can be obtained at www.falconwaterfree.com.
